

Dawson Van Orden was founded as Van Orden Engineering in Houston, Texas in 1974. Today, Dawson Van Orden has grown to become a full-service engineering firm offering diverse project experience in a wide range of services including:

- Mechanical Engineering Design
- Electrical Engineering Design
- Plumbing Engineering Design
- Civil Engineering Design
- Structural Engineering Design
- Platting Consulting Services
- Plan and Profiles
- Life Safety and A.D.A Design
- Building Inspections and Due Diligence Reports
- Engineering Feasibility Studies
- Civil, Structural & MEP Comparative cost studies and Value Engineering

Dawson Van Orden currently employs more than 40 engineers, designers and staff across our multiple offices. As a consulting engineering firm, we feel it's our primary responsibility to produce accurate drawings and meet deadlines. With worship facilities of all denominations and their fellowships demands, our experience shows we can deliver projects of any size. With our more than 40 years experience to draw from, Dawson Van Orden can exceed your expectations.

## Jason Dawson, P.E., LEED AP

During the past 10 years Jason has specialized in Industrial, Religious, Commercial, Medical, and Private School Facilities. Jason has been the Project Manager and/or Engineer of Record on over 200 projects per year for the last 7 years. He brings his expertise in equipment and systems to the firm as well as a working knowledge of virtually all types of HVAC projects. Now majority partner and Chief Executive Officer of DVO, Jason's forward thinking allows for the firm to be in a state of constant transformation, excelling and breaking barriers in the engineering world.
